

U.S. WORKHOLDING INDUSTRY

Improving Productivity Worldwide

Rotational Workholding Applications

- Chuck Actuators, Hydraulic and Pneumatic
- Chucks, Collet Type and Collet Pads
- Chucks, Custom Engineered
- Chucks, Diaphragm
- Chucks, Gear
- Chuck Index
- Chuck Jaws
- Chucks, Jaw Type (Power and Manual)
- Chucks, Magnetic
- Chucks, Precision
- Chucks, Quick Change
- Chucks, Stationary
- Chucks 24" (610 mm) dia and over (Power and Manual)
- Expanding Arbors and Mandrels
- Face Drivers
- Lathe Centers
- Steady Rests

I have REVIEWED, CONFIRMED and/or CORRECTED the matrix and do affirm that my company has advertised (catalog, website, etc.) and/or has sold product in each category marked within the last two years.

Company Name: _____ Authorized Representative: _____

Date: _____

Note: Workholding, Rotational: Workholding device primarily designed to grip, locate, and rotate a part during a machining operation such as turning or grinding where the part is rotated against a stationary tool or grinding wheel to remove material.

U.S. WORKHOLDING INDUSTRY

Improving Productivity Worldwide

Stationary Workholding Applications

Adhesive Workholding
 Clamping Components, Hydraulic
 Clamping Components, Pneumatic
 Clamps and Fixturing Components Manual
 Collet Chucks, Stationary
 Custom Engineered Fixtures
 Jaw Chucks, Stationary
 Magnetic Workholding
 Modular Workholding
 Quick Change
 Subplates, Angle Plates, and Tooling Columns
 Tooling Components
 Trunnion Workholding
 Vacuum Workholding
 Vises and Vise Jaws
